ELECTION/RESTRICTION

ELECTION/RESTRICTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. **Claim(s) 1-8** drawn to a method of detecting, differentiating and quantifying a target nucleic acid as well as classified in Class 435, subclasses 5 and 6.
 - II. **Claim(s) 9**, drawn to a pharmaceutical prep made by the method of Claim 1, classified in Class 514, subclass 1.
 - III. **Claim(s) 10-20** drawn to a method for determining and controlling virus inactivation rates of a virus inactivation process, classified in Class 435, subclasses 5, 6 and 325; and Class 424, subclass 93.1.
2. The inventions listed above are distinct for the following reasons:
 - a. Inventions I and III, are patentably distinct in that they are directed to distinct and independent methods comprising different steps and/or goals. While the searches for the two inventions will be similar, in that, they both relate, in some fashion, to the inactivation of an infectious pathogen, the searches will not be identical because, for example, the method of Claim 1 does not require the preparation of a spiked sample as does the method of Claims 10 and 18, therefore, inventions I and III are separate and distinct inventions.
 - b. Inventions I and II; and III and II are related as a process and a product made thereby. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process (e.g. sterile culture).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. The applicant is advised that the response to this requirement, to be complete, must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ethan Whisenant, Ph.D. whose telephone number is (703) 308-6567. The examiner can normally be reached Monday-Friday from 8:30AM -5:30PM EST or any time via voice mail.
